

PURPOSE

The Center for Innovation in Healthy and Resilient Aging (CIHRA) is an interdisciplinary and interprofessional endeavor at ASU to promote research, training, and education that helps solve challenges in aging. The majority of CIHRA's efforts focus on innovative wellness, strength-based, and resilience- and capacity-building research opportunities that would translate into positive change from the level of the individuals and families, to organizations and systems, and ultimately to communities and local, national, and global policies.

One or more Undergraduate Student Scholar position(s) will be available starting in 2020. The 10-hour-per-week position is for one year and helps provide training for students interested in careers that tackle key challenges in aging across disciplines. Undergraduate Scholars will receive research experiences as they work under the supervision of CIHRA faculty. Scholars will be expected to participate in monthly CIHRA meetings and related activities, including proposal feedback and updates.

Undergraduate students who are interested in aging and majoring in one of the following fields are strongly encouraged to apply: health and human services; social and behavioral sciences; arts, humanities, and design; journalism; and law.

For more information about CIHRA, [visit our website](#).

ELIGIBILITY

Qualifications include current ASU enrollment as a junior or senior in a program focused on one of the fields listed in the previous section. He or she must also be good academic standing (GPA 3.0 or above).

APPLICATION

To apply, submit a one-page, single-spaced statement (11-point type, ½" margins) of your interest in pursuing research in aging, your curriculum vitae, and the names and contact information of three professional references, preferably at least one of whom is an ASU faculty member. Send your application to Angelica Jaszewski (Angelica.Jaszewski@asu.edu). Application review will begin December 2, 2019. We will not consider incomplete applications. Undergraduate scholars are expected to begin their work in January 2020.

~~~

Arizona State University is an equal opportunity/affirmative action employer. Employment eligibility verification required on hire. Applications from ethnic and racial minorities, persons with disabilities, and persons from economically and/or culturally disadvantaged backgrounds are strongly encouraged (<https://researchtraining.nih.gov/resources/faq#Diversity>).
